

 <b>PETRÓLEO BRASILEIRO S.A.</b> <b>PETROBRAS</b>	<b>PEI</b> <b>FPSO Cidade de Niteroi</b> <b>Anexo 15a</b>	<b>Compromisso</b> <b>CCA/PETROBRAS</b> <b>Seção 1 de 6</b>
---	---	---

A PETROBRAS assinou, em 01 de junho de 2001, contrato com a *Clean Caribbean & Americam* (CCA) para fornecimento de equipamentos, materiais e serviços de combate a derramamento de hidrocarbonetos.

A CCA (antiga sigla CCC) é uma cooperativa internacional, existente desde 1977, com atuação estatutária nas áreas costeiras de toda a América do Sul, México e Caribe. Possui como membros algumas das maiores empresas de petróleo do mundo (*ExxonMobil, Conoco, Chevron USA, Shell, Texaco, BP Amoco, PDVSA*, entre outras). Seus equipamentos consistem em módulos aerotransportados para contenção, recolhimento e armazenamento de óleo, além de aplicadores de dispersantes, equipamentos de limpeza de praias e para queima de óleo *in situ*, barcos de serviço, unidade de reabilitação de fauna, além de materiais diversos (bombas, compressores, etc.). Opcionalmente, pode fornecer pessoal treinado.

A CCA está localizada na Flórida, próxima de dois grandes aeroportos internacionais (*Fort Lauderdale* e Miami), e está preparada para embarcar com grande rapidez os equipamentos materiais que forem solicitados. A PETROBRAS treinou na especificação e manuseio destes equipamentos mais de 50 profissionais, dos quais 05 na Bacia de Campos, cujos nomes são fornecidos no *Anexo 8*.

#### Logística:

A logística envolvida é bastante simplificada, a fim de tornar o processo extremamente ágil. O transporte via aeronave comercial (*Boeing 727, Boeing 707* ou DC8) é facilmente disponibilizado nos EUA. Os equipamentos são acondicionados em *palets* (dimensões máximas para equipamento regular 3,20 m x 2,30 m, pesando um máximo de 3100 kg, aproximadamente).

No Brasil, o desembarço alfandegário no Aeroporto Internacional Maestro Antônio Carlos Jobim (Galeão) conta com a infra-estrutura da Área de Materiais da PETROBRAS (localizada no Edifício Sede, no Rio de Janeiro), possuindo vasta experiência no assunto.

O transporte desde a Cidade do Rio de Janeiro até a Cidade de Macaé pode ser efetuado através das seguintes alternativas:

- Duas rodovias, uma Estadual (RJ-106) e outra Federal (BR-101);
- Ferrovia com acesso direto ao pátio interno da PETROBRAS no Terminal Marítimo de Imbetiba;
- Marítima, também com acesso ao Terminal Marítimo de Imbetiba;
- Por via aérea, com alternativas de desembarque nos aeroportos de Macaé (1ª alternativa), Campos e Cabo Frio (aeronaves de maior porte).

Todas estas vias de transporte são possíveis de serem viabilizadas através dos contratos já estabelecidos, possibilitando à Companhia escolher aquela alternativa mais adequada às circunstâncias do acidente e contornar eventuais contingências momentâneas.
